# Get Started

**Write and upload your first program to Makey!**

1 Go to the MakeCode website and copy the block code pictured below (make sure to add the "Neopixel" extension). Or, use the QR code to get the code online.
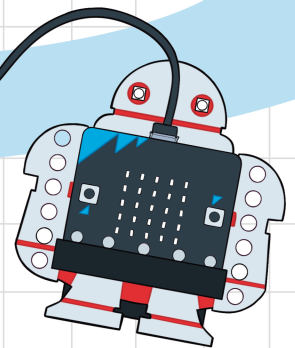

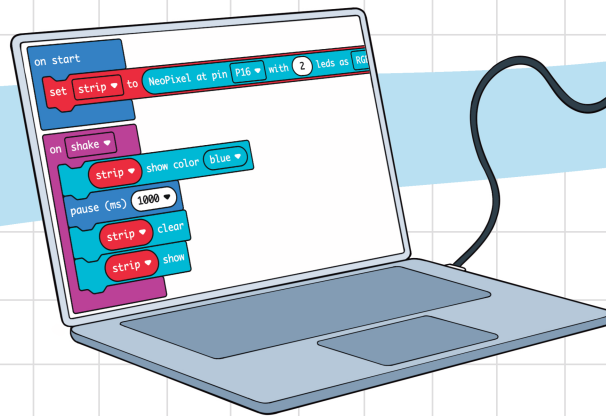

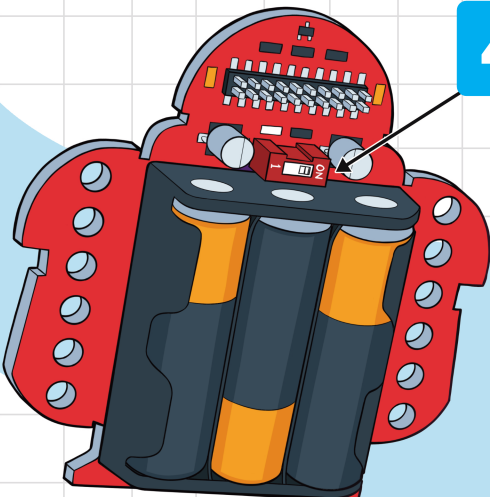

MakeCode

Sample code

```
on start
set strip to NeoPixel at pin P16 with 2 leds as RGB

on shake
  strip show color blue
pause (ms) 1000
  strip clear
  strip show
```

2 Slide the micro:bit into Makey.

3 Plug the micro:bit into the computer with a USB cord, then upload the code using the instructions here:

```
on start
set strip to NeoPixel at pin P16 with 2 leds as RGB

on shake
  strip show color blue
pause (ms) 1000
  strip clear
  strip show
```

4 Unplug the USB cord, then switch Makey on.

5 Shake Makey to make its eyes light up! Can you modify the code to make an "M" appear on the LED display?
